EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Rob Tuttle (Reg. 54,504) on May 9, 2005.

The application has been amended as follows:

In claim 21, please replace "The method of claim 11" with "The method of claim 20".

In claim 22, please replace "The method of claim 11" with "The method of claim 20".

Allowable Subject Matter

Claims 1-24 are allowed.

The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claim 1 is the inclusion of the limitation of partitioning the information regarding a plurality of signals present in adjacent conductors into phases; calculating a voltage induced in the conductor coupled to the device during each phase; calculating an average voltage induced in the conductor coupled to the device; and flagging the device if the average voltage induced is above a predetermined threshold. It is this limitation in the claimed combination that has not been found, taught, or suggested by the prior art that makes these claims allowable.

Art Unit: 2863

The primary reason for the allowance of claim 20 is the inclusion of the limitation of extracting information regarding a device from a database; partitioning the extracted information into phases; determining a weighted coupling contribution; determining a non-weighted coupling contribution; and calculating a voltage induced during each phase, wherein the voltage induced is determined using the weighted and non-weighted coupling contributions. It is this limitation in the claimed combination that has not been found, taught, or suggested by the prior art that makes these claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Perreault et al. (US 6,011,508) teaches calculating voltage induced at a sensor from the signals induced in each of three phases (column 11, lines 14-18).
